

Today's tech teams need HIPAA training created for them.

Our modern training prepares your teams for the challenges they're facing today, not 20 years ago. With up-to-date content that covers legal regulations automatically, you can provide your team with training they'll actually enjoy.

Effective, engaging HIPAA training for modern teams

Not a HIPPO. And no, the "P" doesn't stand for Privacy. This course covers the basics of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), which governs the regulations and standards that a HIPAA-compliant organization must meet, and is geared toward U.S.-based tech companies who collect, use, handle, and store personal health information.

- Provide best practices for identifying and properly handling PHI from the lens of a tech company.
- Give everyone the same baseline knowledge of HIPAA's root principles of proper and ethical handling of data.
- Real world examples illustrate how HIPAA violations can happen to anyone.

Core Learning

40 minutes

Topics included

Introduction to HIPAA

HIPAA Basics

Consumer Rights and Privacy

HITECH

Omnibus Rule

PHI and Security Safeguards

Violations and Penalties

Specific laws to keep in mind – don't worry, we've got you covered:

HIPAA • HITECH • Omnibus Rule
